

Portfolio Website Project

Task:

Create a simple portfolio website with the following features:

1. Navbar:

- A navigation bar with links to different sections (e.g., Home, About, Portfolio, Contact).
- **Login button** that routes the user to [Login.html](#) when clicked.

2. Hero Section:

- A large introductory section at the top with:
 - A heading (e.g., "Welcome to My Portfolio")
 - A short description
 - A background **image** or a picture that represents you or your work.

3. Grid Layout:

- A grid of **five photos** displayed in a row or grid layout.
- Each photo should be inside its own box or container.

Submission Requirements:

- **GitHub Repository Link:** Submit the link to your GitHub repository where the project is hosted.
- **Live Server Link:** Submit the link to your live website (you can use platforms like GitHub Pages, Netlify, or Vercel to deploy).
